

We present four new models of accessory chairs and armchairs.

ARIEL

It is a new model with visible lacquered wood arms that is manufactured both as an armchair and as a 2-seater sofa. It was designed for the Contract world, but we have incorporated it into our general catalogue since we believe that Ariel, like Boomerang, can be a special accessory armchair to combine with the rest of the modular programmes and sofas in our catalogue. They become the ideal complement for models such as Pacific, Korinto&Luxor, Klee&Klever or Teseo.

ARIEL

NEW ACCESSORY ARMCHAIRS

DRACO

AQUARIUS & DRACO

They are two new chairs with arms that are slightly larger than our Mili&Lalo chairs. Their great comfort is notable, framed by a timeless design that can fit into all types of environments.

They are manufactured with a new construction system that guarantees the solidity of the legs beyond most chairs on the market. The construction of the seat with our NEA system, which provides unparalleled comfort, is also noteworthy.

Aquarius and Draco can be used as dining chairs or as complementary seats to combine with any sofa.

ZIPO

It is a new accent armchair from the Arianne family, designwise located halfway between the Zipi&Zape footstools and the Mili&Lalo chairs.

It is an ideal seat to use as a complement to any of our models. Its flexible backrest provides exceptional comfort.
