

TEN YEARS AGO, WE PRESENTED ARIANNE

Ten years ago, we presented one of our most emblematic models: ARIANNE.

In 2014, four years later, we presented Arianne Love and new units such as the corner unit Z with chamfer edge, the end unit “Y” and the round footstools collection. The Arianne options were increasing.

In the following years, we launched new exclusive fabric collections which gave our star model a new and special touch every year.

It has been 10 years in which Arianne has become a new philosophy of life. Thousands of families from over 70 countries have seen how their lives have changed.

Since then, we have produced over 200.000 Arianne modules.

As this year is Arianne’s 10th anniversary, we thought we should pay tribute to it. Therefore, we would like to present a new range of modules which are going to bring our star model up to date as well as allowing us to offer new solutions to all types of homes.

.....
**“A
 philosophy
 of life”**

ARIANNE ARM OPTION

.....
This is the Arianne's 10th Anniversary and we would like to pay tribute to our most emblematic model. Therefore, we would like to present new elements which will update Arianne as well as providing new combinations to fit different types of houses.

Most companies say that they listen to their customers, but the truth is that most of the time they do not keep their word. We are going to show you that we pay attention to all our customers.

One of the most common requests is the possibility of including an arm for our Arianne model. No sooner said than done, here we have the new arm for the Arianne, which can be easily attached to any module.

REVERSIBLE ARM OPTION

2 A modules (without arm)

With 1 arm on the left

With 1 arm on the right

With 2 arms (right and left)

**Interchangeable
arms**

ARIANNE

Furthermore, we would like to present the end modules with round and curved shapes, which will increase the number of combinations for future Famalovers

NEW END MODULES

Module "S" is a smaller chaise longue with similar measures to unit "Y". "T" is a chaise longue with just the right length to straighten the legs completely. They can also go with or without arm.

Module "Y"

Module "S"

Module "T"

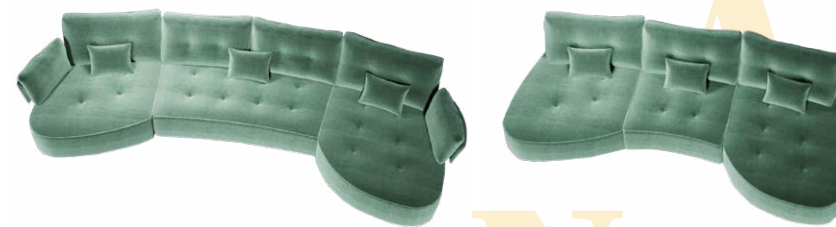

Modules "A", "M", "L", "V", "VX"

2 end modules with 1 module A (with and without arm)

Curved central modules (with and without arm)

If you place an "A" unit in between two end modules, you can see how beautiful the composition looks (without arms, with one arm or with two arms, just as you prefer).

We could change unit "A" for the new front-curved unit "M". The result can be seen in the photo below.

But we have more options: if we use unit "L", we can get a slightly curved combination which is ideal to place it in the middle of the room (check the left hand side photo). In the right hand facing, we can see how it would look with a "V" unit in the middle of the composition. Just like this, we could keep adding modules in order to adapt them to different living rooms.

ARIANNE NEW ELEMENTS

.....
These new units for the Arianne are going to increase the number of compositions, no matter if they are big or small.

“R” NEW CORNER UNIT

Concerning the corner unit, module “C” was our first design, then we added the Arianne Love corner unit “Z”, and this year we are launching our new corner module “R”. This new unit will allow us to have more open corners and therefore more seating space. It also offers customers the possibility of having a curved composition. In addition, it has one more back cushion than module “Z”, and it can be combined with all the new modules.

Corner modules “C”, “Z” and “R” combined with curved and straight modules

Corner “C”

Corner “Z”

Corner “R”

.....
**We have also
 created ending
 footstools with
 round shapes**

NEW FOOTSTOOLS

Do not forget about our new
 end footstools, a new way to
 complete the compositions,
 no matter if they are big or
 small.

Footstools "PT1", "PT2" and "PS"

End footstool "PS"

End footstool "PT1"

End footstool "PT1"

End footstool "PT2"
